17 Jun. 94 Shook, Hardy.., Re OSHA

Leo Dryer, RCA, Andrade, Poltorf, McAlpin, WHO, WRE,
Bill Davis (same as Nov. 93, Richmond), Jane Kotha (SHB) [cancer]
Wendelle Stone (SHB, cardiovascular)

'Sign. risk 1/1000 mortality or morbidity or irritation,
annoyance: not clear

will send this to me!

WHO particle standard: 100 µg/m³; no problem (Bill: saver?) !
~~see Pittsb~~

ASHRAE 62-1989: standard

Fountain: data out of CRISP (private domain database)
originally workplace data: 1.13 → final: 1.39
Loreen: where comes questionnaire from?

'trivial', 'minor' changes: put into perspective !

WRE: Is there a scientifically good ~~the~~ epidem. study on CVD which we can use to generate our own risk assessment (?) !
→ look at ~~Peto Lee's~~ book

20-40,000 comments expected by OSHA

[Lowry and Repace paper → key references] BHR

[neg. pressure approach: addl. confounder risk?]
